

FIG. 1

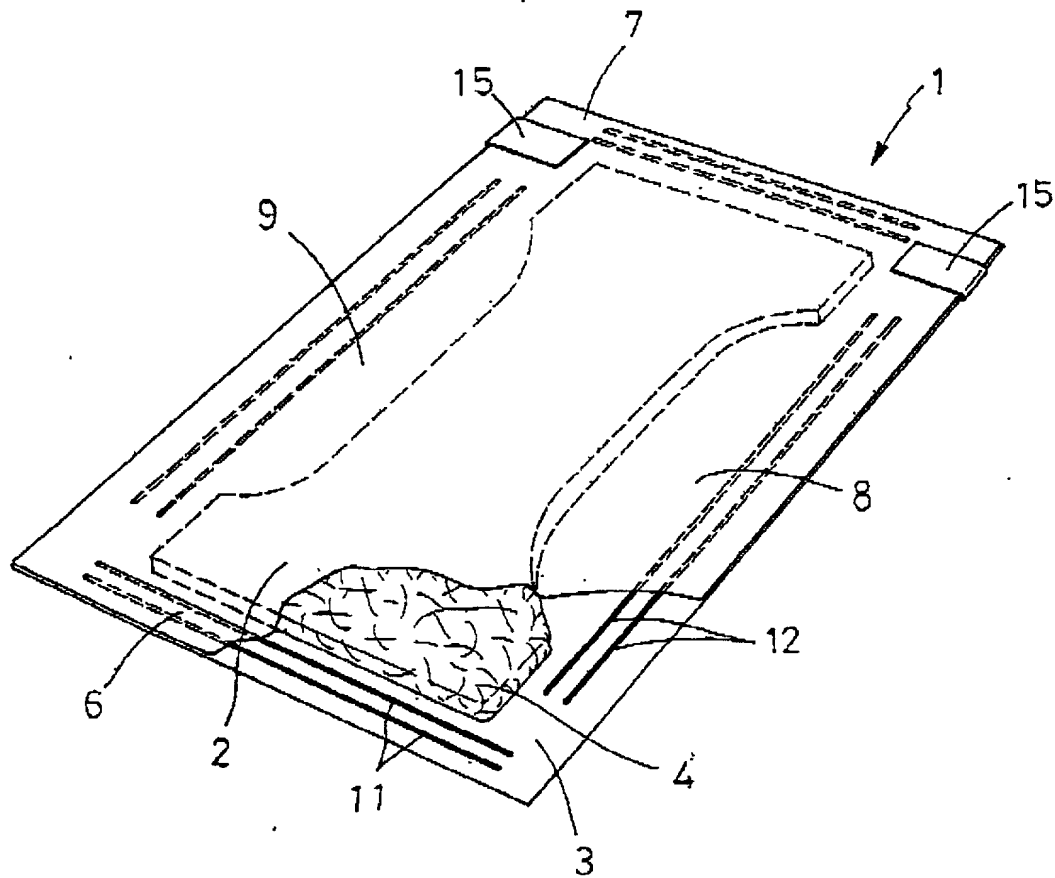

FIG.2

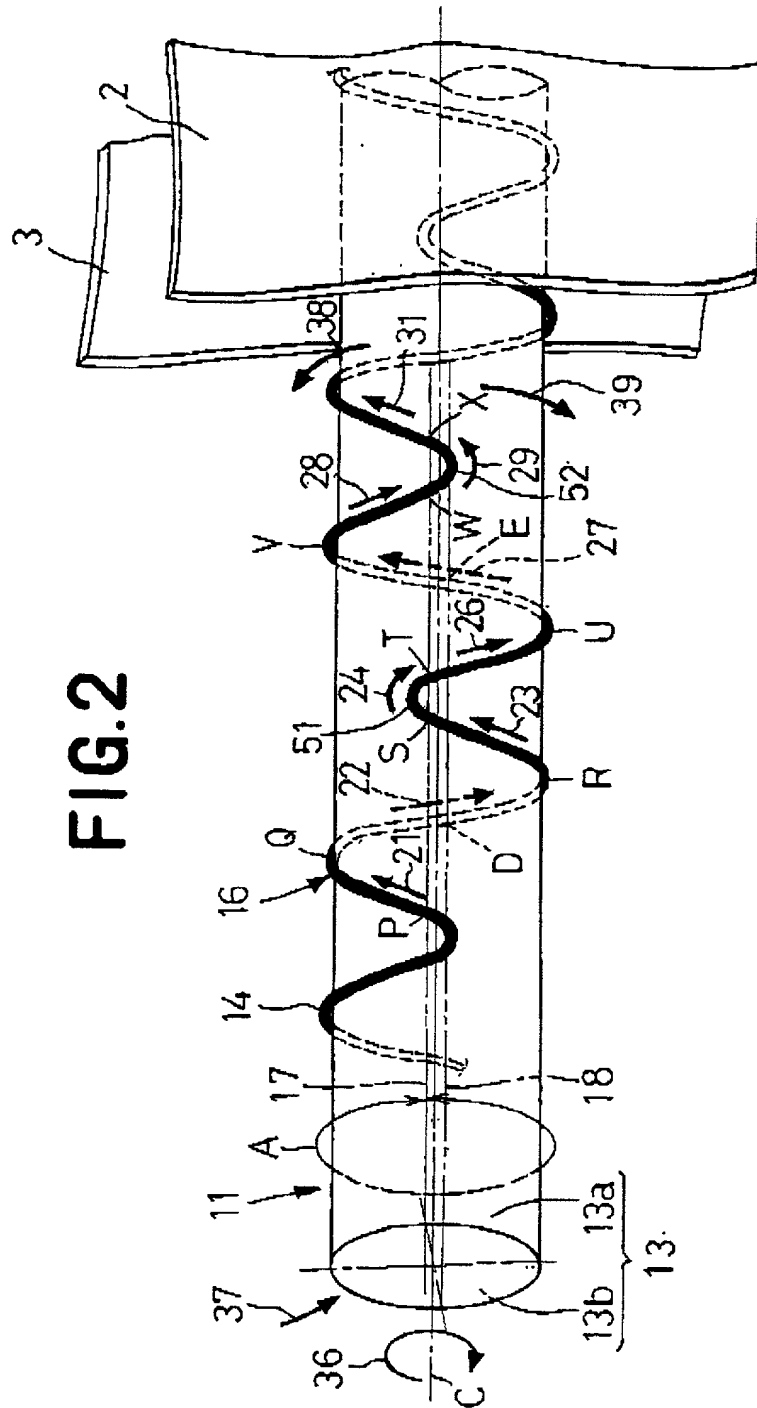

Figure 1 illustrates the experimental setup. A participant is seated at a table, looking at a computer monitor. The monitor displays a sequence of visual stimuli: a fixation cross, a target stimulus (a red dot), and a response stimulus (a green dot). The participant's hand is positioned over a response button. The computer system records the participant's response. The diagram also shows the participant's hand and the response button.
